CR1009/06/04M Cleanroom Microfibre Wiper

Microfibre wiper is constructed from continuous-filament microfibre in a double knitted, no-run interlock pattern. It's of high absorbency and soft, can be cold cut or cut and sealed by laser or ultrasonic or heat. It's laundered and dried, packed in ISO4 cleanroom with professional cleanroom washer and drier. The water for laundry is ultra-pure water with resistance of 18Mohm·cm⁻¹. Our wiper can be used in the critical environments like wafer processing, TFT-LCD, etc.

CR1009/06/04P Cleanroom Polyester Wiper

Polyester Wiper is constructed from continuous-filament polyester in a double knit, no-run interlock pattern, Cleanroom laundered and packed. The polyester wiper exhibits highest absorbency function. The lowest particle generation and ion content of all single player sealed-borderwipers. Applied to 100-10,000, Can be Laser cut and packed

CR1035-55 Cleanroom Roll Wiper

The Wiper is made from micro-fibre material which is dust-free, Little particles out. It's rolled up and packed in class 100 cleanroom and good absorbency of solvent and oil, excellent capacity to remove contaminant and dust. Idea applied to TFT-LCD, FPD, PCB and SMT industry. The size can be customized.

CR1009/06/04N Cleanroom Non-Woven Wipes

- Fabricated from a hydroentangled, non-woven blend of 55% cellulose and 45% polyester.
- High absorbent property of natural fiber with the cleanliness, strength and durability of synthetic fiber.
- Packaged in the Class 100 cleanroom(ISO 5).
- Very clean, soft, low extractable levels and solvent resistance.
- ISO9001:2000 quality control program to guarantee consistent quality.
- Economical, ideal for general purpose wiping and spill control
